

PIANO CHORDS CHART

LEARN HOW TO PLAY
ALL MAJOR AND MINOR
CHORDS ON THE PIANO
WITH DODEKA MUSIC

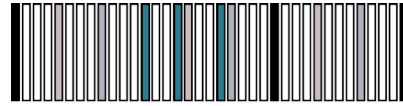

On the Dodeka keyboard, all chords have the same fingering regardless of their tonality. This means that you only learn your chords once and for all. To play other chords, you just have to move your hand along the keyboard reproducing the same fingering. No need to learn all twelve fingerings, genius right?

What's this keyboard?

The Dodeka Keyboard Design is an isomorphic piano keyboard where all keys are set at the same level in a straight linear fashion. Learn more at: www.dodeka.info/dodeka-keyboard/
