

PIANO SCALES CHART

LEARN HOW TO PLAY ALL
MAJOR AND MINOR SCALES
ON THE PIANO WITH
DODEKA MUSIC

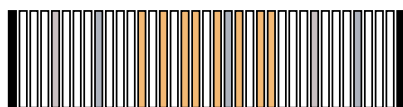

On the Dodeka keyboard, all scales have the same fingering regardless of their tonality. This means that you only learn your scales once and for all. To play other scales, you just have to move your hand along the keyboard keeping the same fingering. No need to learn all twelve fingerings, genius right?

What's this keyboard?

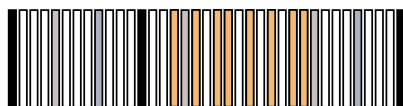

The Dodeka Keyboard Design is an isomorphic piano keyboard where all keys are set at the same level in a straight linear fashion. Learn more at: www.dodeka.info/dodeka-keyboard/
